"We hold some views which are a little different from the views held by other denominations; anything which we caunot prove by this Bible (holding up the Bible)." they take care to begin in such a way as to keep nususpecting Christian people from seeing divergence of Mormonism from Christiauity, and to proceed in such a way that when the divergence afterward appears, it will seem to the ordinary mind so slight as to be immaterial. The following is Mormon Church, as it is generally 500 Ruled Note Heads the substauce of what they will say as called.

Having made the above points all clear to one whom the "elders" are trying to teach, they then submit the proposition that neither baptism nor give you in these conversations and in these tracts is as follows:

At the records of what they will avail nuless the one administering these ordinances is duly authorized so to do.

They then nudertake to prove that no one is authorized to teach, preach, or administer the ordinances except the Mormon priesthood. By their peculiar methods of interpreting Scripture, they "prove" that the Chris-tian Church of old was to apostatize immediately after the apostolic age, and then by similiar use of history they "prove" that as a matter of fact the church did so apostatize, that the dark ages" came on because of such apostasy, that the Reformation was merely an effort on the part of man to establish the Church of Christ, but was a failure because there was no revelation and no true prophet to lead in the work, and that there was no true church in the world from the ancient apostolic times to the days of Joseph Smith, who was duly "authorized" by prophecy and revelation, as of old, to reestablish the true church

CHAPTER VII.

THE GARDEN OF ST. MICHAEL.

On our way back Ceci was aomewhat separated from me, whether by accident or de sign, I cannot say. I did not quite regret this, as I had unde up my mind to see as little as possible of him for the future, thinking he had repaid himself for his kindness, by the proposals he had made to me. In may say I never sought his society, although, until he showed his hand, his visits and conversation gave me some pleasure, for, not withstanding his position, he was a wellintormed man, who, in the earlier part of has life, must have seen better days, and perhaps hoped to see them again, if his plot succeeded. The words he had let drop, to the effect that the Medici would come back, had given me a hint as to what that plot was, it was evident that my old friend was an active member of the fligh or tirey Party Florence, that were then working secretly for the restoration of Lorenzo's sons. accouncil clear, too, that the attempt to be mole was to be directed against some very rminent member of the state-perhaps the Confaloniere himself, and I began, to won der il it was not my duty to lay the infor mation I had before the Signory. I could net, however, reconcile this with my promuse of silence, and therefore my tongue was tied. Still I could not sit tamely by, and see a man murdered in cold blood, and I deeided, therefore, to remain in Florence somehow, and if possible avert the crime, although it would interfere, no doubt, with biv char business. But one cannot always be thinking of one's self. Perhapaalso, though not quite conscious of it then, I had some idea of again meeting the unknown lady of the gata procession, in whom, in spite of my self, I felt I was taking too great an interest.

During the night I had but little sleep, for the affair of the mad partisan of the Medici, and the declaration of war, had roused the citizens to fever beat, and all night long crowds thronged the streets. their hourse shouts of "l'opolo! l'opolo rangling with the incement clanging of the war-beit, which itself was loud enough to wake the dead. The next day, however, I resolved to tuke the bull by the horns, and with a view to fill my purse, determined to present myself before La l'alisse, and offer han my sword. I sallied out, therefore, finding the streets fairly empty, the all-night indignation meeting of the Florentines having weared them a little. Still, however, there were knotn of people here and there, all in a more or less excited condition. I was in no particular hurry, and, taking a lesson from the small, went at a leigurely pace, and eventually reached the headquarters of La l'alisse, which were in the Medicean palace, in the Via Larga. The courtyard and entrance-hall were full uf soldiers, and evidently uctive preparations for the campaign were in progress, for there was a continuous stream of people going in and out. No one took any notice of ure, and holding up my cap in one hand, and atraightening the feather on it with the fingers of the other, I advanced unquestioned through the crowded rooms. In this manner I proceeded nutil I came to a gallery, on one llank of which there was a series of windows overlooking the street; at the end of the gallery hing a purple curtain, covering, as it happened, an open door. On the curtain itself was embroidered a crimson shield, bearing the palle of the Medici. Before this I was stopped by a young officer, who asked me my business,

und I replied it was with La Pahise himself.
"Impossible!" he replied; "you caunot see the general."

"Why not, aignore?"
"Tush, man! You look old enough to understand that orders are orders."
"What is it, De Brienne?" a sharp voice called out from within. The officer lifted the curtain, and went inside. I was determined to gain an interview with the great man, and had therefore said my business was of importunce. The leanness of my purse was my excuse for the subterfuge, which I ambsequently regretted, as will be seen further on. Shortly after De Brienn rame out. "Well, meser—meser—"
"Donatl," I said.

"Well, Donati, the general will see you. You may enter.'

I accordingly did so, and found myself in the presence of a short, thick-set man, seated at a table, on which was spread a usp, over which he was looking intently. In a rorner of the ronn lay his helmet and aword, and he himself was in half-mail, wearing a Milarcse corselet, on which was emblazoned the red dragon of his house. As his head was beut over the paper, I could not at first make out his features, and remained stand-ing patiently. Suddenly he lifted his face, and looked at me with a quick "Well-your

You have gained admisaien to me under a protence-go!" and he esumed his atudy of the map. I would have urged the matter, but all my pride was aroused at his words, and so, with a short good day, I tuened on my heel and walked out. Passing through the gallery, I saw De Brienne, leaning against an open window, talking to another young officer. They both looked at me, and burst into a loud laugh At any other time I might have treated this with contempt, but I was sure all over at my reception, and approaching the two said: You seem anused, gentlemen-it is not well to laugh at distress.

They stopped their laughter, storing haughtily at me, and De streene suid: "Your way, signore, lies before you," and he pointed down the corridor.

It illd not require me to carry my percep-tion in my right hand, to be aware that has Palisse was capable of fulfilling his threat. and although I was inclined to draw on him there and then, I knew what the ultimate results would be. So swallowing my pride as best I could, and regretting the ill-bumor which had subjected me to this insult, I

atalked into the atreet. I made my way to my ordinary, and sat there to cool, which took some time. I was able to see that the rebuff I received was line in great part to my own mismansgement; also that there was no hope for me from La l'alisse, and that my steps must turn elsewhere if I wished my purse to show a full-fed specarance. I dined sparingly, drinking lint a half measure of Chianti, which I mixed ith water, and it made but a thin fluid. When I finished my slender repast, there was nothing left but to kill time. It was useless to go back to my lodgings, for want of funds had compelled me to discontinue, until better times, my newly sequired habit of reading, and Ceci, despite the kindness he had shown me, was precise in the exaction of payment for officen performed by him. No more indeed could be expected from a buckstering mind such as his, inherital no doubt from a line of heresising extra zens, whose hearts were in their bales of wool. So I atrolled owards the garden of St. Michael, passing on the way the piazzi, and wondering at the implacable hatred of

And this set me reflecting on the unreasoning stupidity of the cauaille, in their enmity towards gentle blood. Perhaps I was a little influenced in these thoughts, from the fact that the Uberti were connected by marriage with tha Savelli, a daughter of Maso degli Uberti having wedded that Baptista di Savelli who upheld by force of arms his right to attend the Conclave of Cardinala. It was earl to think that of the Uberti not one was left, and of the Savelli—I alone. I will not inciude the Chigi, for they come through the female line, and although Amilear Chigi, the son of my father's old enemy, subsequently made advances of friendship towards me, I felt bound to explain to him that I was the head of the bouse, despite the broad lands his father got with his mother Olymria, by an unjust decree of the Chamber of This, however, is a family affair, which does not concern the narration it hand. Having reached the garden, I sat myself to rest on a stone seat, set against a wull overhung by a large tree. At the further conversation. Their backs were to me at first, but on arriving at the end of the walk they turned slowly round, and came towards ine. As they approached, I was almost surthey were the two I had seen in the gula procession, and my doubts were soon at rest for, on passing, they glanced at me with alle curiosity, and in a moment I recognized them by their air and gait. On this occaaion they wore no manks, and I saw they were both young and passing fair. The face of the shorter of the two, whose figure had a matronly east, was set in a mass of light hair, and looked brimful of good humor. The other, who, in marked contrast to her companion, had dark hair and dark eyes, casessed a countenance of exceeding beauty marred perhaps by its expression of pride. Be that as it may, my blood began to tingle an I saw her, and an indefinite thought of what might have been rose into my mind. When they had gone a few yards, the on whom I took to be a married woman said something to her friend, and glanced over her shoulder; but the other appeared to reprove the remark, increasing as also did no the pride of her carriage. I wondered to myself that two ladies should be out unattended, in so sequestered a spot, at a time, too, when the city was an full of excitement, and watched them an they turned the corner of the walk, and went out of sight be-yond the trees. I began in a useless manper to speculate who they were, and to weave together a little romance in my heart, when I was startled by a shrick, and the next moment the fair-haired Isdy came running round the corner of the road, crying

for help. It was not 50 yards, and in less time than I take to write this I whipped out my sword, and was hurrying to the spot. I saw, when I reached, the taller lady struggling in the arms of an ill-looking ruflian. She called out on my coming, and the man, leesening his hold, was about to make off, when, unwilling to soil my sword with the blood of a inw-born scoundrel, I struck at him with my fist, and the cross handle of the

"Madam, 4 did nothing but drive off a cur-you thank me too much | Food day." I stood cap in band until they turned the clow of the walk, and they retraid its steps to my lodging. As I went back, I coul not help rading at my link. I was enables to du a service, which, for no reason I could assign, I would rather have slone to this particular woman thon any other-a service which should have made her look kindly at me, and yet by a cruel stroke she was nade to think me nothing che but a thref. for Luizi's charge was d finite, and at was clear I knew han. My name was also known to her, and perhaps the rest of my story, a it was understood by the pulder, would be told to her, and then, ad eu to my lattle re nerice, if it was not achea already. Then again what business had I to have such thoughts? I had yet to learn that these things come unbid len, and when they come take no denial. Thinking in this way as I walked on, I was surprised to the I had reached the old Albazzi Pilace. This build like all the other houses of the notice of Facence, was fortified with bravers of

It was in one of these that I had my abode, and reaching it about sumlown, i legan to slowly ascend the stairs which hid to my chamber. Occasionally 1 stopped and rested, and it was during one of these rests that I looked up to the lambug above me. It was still in light, for the setting sun shone through a gighteshaped window in the western wall. As I glanced up, a figure suddenly appeared at the head of the stangers and leaning one hand on the bahrstrade peeved down into the dam light below it. I recognized the extraordinary dress at once, and a minment's survey of the face assured me it was my host of the hovel, he who had so strangely disappeared with the gul, when I fought with Bried at Perugui.

"A good day to you, friend!" I called out, "and well met."
"Who calls? Who is there?" he an-

awered. "One moment; let me shinh up these atairs," and I made my way to the landing, and held out my hand.

He took it in silence, but his grip was "Signore," he said, after a moment, "I do not know your name, but wheever you are,

"My name," I said, "for the present, is Donati, and us for gratifule, there is no need to speak of it."

As he mentioned his name, I remembered that there was a madman, so called, who had come into notoriety years ago, by asserting that he had discovered the sceret of pautonging life to 120 years. He had, theard, written a book in which this was tally described, and presented it to the tibo pope, with the inscription, "Videbis dies Petrie et ultra." at Jerusalem when Bera left Habylon on his mission. Seventy-eight years had passed since the lirst carnyon of the exiles had returned to the loone land, 50, noo strong. The temple had been built, lut the aquosition had been so great that the walls had not been restored and the rubidsh still arose in longstretelding mounds. The vision of smi den glory and greatness had faded away. Laxlty, ignumnee and indifference followed. The spiritual life declined, the ideals faded, the Salibath was descented. Ezra needed three things "men, money and authority. The king gave the latter two, and permilited the men to salunteer. His deerre is given in Ezra 7:11-26.

11. The Journey to Jerusalem, Vs. 21-2. The starting point was (v. 411 "at the river Ahava." The place is anknown, but it was probably one of the canals near Balylon, flowing into the Emphrates. The assently consisted of about 1,700 persons, including heads of families and their retainers (Ezra 5.1-11), priests, Levites, and 22 t Nithenlin, or the servants who masked in the work about the temple, so that the Levites could assume the higher position as religious instructors of the people.

Have you heard the motto of the government of Siam? And having heard it, have you rejected it? And having repeated it, have you caught its juriely personal application? And having caught it, have you tried it on your friends? This is the motto: "Ah Wa Ta Nas Siam." It sounds unintelligible nonsense, but keep saying it over as long as you can and as fast as you can and you will discover at last that the eastern patois has a western sense that aptly classifies many a removeful sulgect of I nele Sam. For "Ah Wa Ta Nas Siam" is easily evolved into "Ah, what an ass I am."—Chicago Chronicle.

(Confinued from last week.)

Martin is sitting by the window, and does not work a much as he looks through the window: when any one passes by in boots that he does not know, he bends down, looks out of tha window, in order to see, not only the feet, but also the face. The houseporter passed by in new felt-boots; the water-carrier passed by; then came alongside of the window an old soldier of Nieholss's time, in an old pair of isced felt boots, with a shovel in his handa. Adam recognized him by his felt boots. The old man's name was Stepannitch; and a neighboring merchant, out of charity, gave him a home with him. He was required to assist the house-reporter. Stepannitch began to shovel away the snow from in frout of Adam's wisdow. Adam glanced at him, and took up his work again.

"Pshaw! I must be getting crazy in my obl age," said Adam, and laughed at himself. "Stepanuitch is clearing away the snow, and I imagine that Christ is coming to see me. I was entirely out of my mind, old detard that Adam sewed about a dozen stitches, and then felt impelled to look through the window again. He lookont ngain through the window, and sees Stepannitch has lesned his shovel against the wall, and is either wurming himself, or resting. He is an old, broken-down man: evidently he has not strength enough, even to shovel the snow. Adam said to himself, "I will give him some tea: by the way, the samovar must be boiling by this time." Adam laid down his awl, rose from his seat, put the samovar on the table, made the tea, and tapped with his linger at the glass. And Adam filled two glasses, and handed one to his guest; while he himself poured his ten into a sancer, and began to blow it.

Stepanuitch finished drinking his glass of tea, turned the glass upside down, put upon it the half esten lump of sugar, and began to express his thanks. But it was evident he wanted some more.

"Have some more," said Adam, fill ing both his own glass and his guest's. Adam drinks his tes, but from time to time keeps glancing ont into the aml relatives last week.

"Are you expecting any oue?" asked his guest.

'Am I expecting any one? I am ashamed even to tell whom I expect. I am, and I am not, expecting some they will spend the winter. one; but one word has impressed itself upon my heart. Whether it is a upon my heart. Whether it is a sentative of Owsley, Jackson and dream, or something else, I do not know. Don't you see, brother, I was treading yesterday the gospel about comb, and G. C. Moore, of Welched, how he watked on the earth. I son. suppose you have heard about it?"

"Indeed I have," replied Stepanuitch: "but we are people in darkness; we can't read." "Well, now, I was reading about

that very thing,—how he walked up-on the earth: I read, you know, how he comes to the Pharisee, and the Pharisee did not treat him hospitably. Well, and so, my brother, I was reading, yesterday, about this very thing and was thinking to myself how he did not receive Christ, the little father, with honor. If for example, he should come to me, or any one else, I think to myself, I should not even know how to receive him. And he gave him no reception at all. Well! while I was thus thinking, I fell asleep, brother, and I hear some one call me by name. I got up: the voice, just as though some one whispered, says, 'Be on the watch: I shall come to morrow.' And this happened twice. Well! would you believe it, it got into my head? I scold my self—and I am expecting him, the little father."

Stepanuitch shook his head; and said nothing: he finished driuking his glass of tea, and put it on the side; but Adam picked up the glass again,

and filled it once more. "Drink some more for your good health. You see, I have an idea, that, when the little father went about on this earth, he disdained no one, and had more to do with the simple people. He always went to see the simple people. He picked out his disciples more from among our brethren ainners like ourselves from the working-class. He, says he, who exalta himself, shall be humbled, and he who is humbled shall become exalted. You, says he, call me Lord, and I, says he, wash your feet. Whoever wishes, says he, to be the first, the same shall be a servant to all. Because, says he, blessed are the poor the humble, the kind, the generous." And Stepanuitch forgot about his tea; he was an old man and easily moved to tears. He is sitting listening, and the tears are rolling down his face.

"Come now have some more tea," said Adam; but Stepanuitch made the sign of the cross, thanked him,

turned up his glass, and arose.

"Thanks to you," he says, "Martin-Adam, for treating me kindly, and satisfying me, soul and body."

"You are welcome; come in again: always glad to see a friend,

From THE FORESTER. By Superintendent of Working Plans, Division of Forestry)

California is not the only state in which the annual burning of the forest is considered among the residents Take one of the best stories in your the best method of protecting the timber from heavy fires. In certain all it is worth understanding. We do sections of the East, notably in the not understand a piece till we have Atlantic Pine belt, many owners of entered into the spirit of it and we do timberland make it a practice to burn over their lands every spring soon after the snow melts and before the surface of the ground has become so dry that light fires cannot be kept nuder control. The object of this asumal burning is to destroy the layyou have done in her place?" If the work is about soon after the snow melis, the ground is somewhat moist so that the fire burns Then in history is a fine opportunity slowly and can be kept under pefect not fairly started at this time and the fire is less liable to injure the timber It would be worth volumes to any than if the burning were done after the sap had begun to run.

Most land owners who treat their forests in this manner burn the entire for use in language, write lists of the area, ancrely with the view of protectthings that he did when a boy, when ing the standing timber. In this a young mau, during the war, in later they are successful, but at the same time a large amount of young growth is destroyed. If the owner of an open forest wishes merely to save the stamling timber without regard to the future value of the land, no better plan can be recomended than to burn the area every year in the munner just described. The ultimate effect on the forest is, however, disastrons.

The effect of repeated fires on the preshuctive power of forest land was tall, manly, boy represent Columbus, studied in Southern New Jersey in later have the landing, pictures again. 1897 by Gifford Pinchot, the result of studied in Southern New Jersey in whose investigations have been published by the New Jersey Geological Survey. In this report it is shown that repeated lires, combined with steady cutting of merchantable timber, reduce the forest so completely that the hand is practically worthless. Many ligures are given to show that burned areas in New Jersey are producing not more than one sixth of the amount of wood they might have yielded, aml that the quality of the product is vastly inferior to what would have grown on unburned land. h is shown also that even this small amount of timber would not have grown were it not for the marvelons power of Pitch Pine to resist fire and to sprout after the trees were killed

The mountaineers are entirely right in stating that the material, which accumulates on the ground where land is not burned, makes a very hot fire. and that the danger would be lessoned if there were areas where there is no inflamable material. No intellegent man would, however, advoate indlacrimiaate burning without a force of men to control the fire.

If burning were resorted to at all as a protection against heavy fires, it should be confined to areas where there is no valuble young growth; but our belief is that it would be possible to organize a system of forest police which would be effective in protecting the standing timber as well as the young growth.

Berea places the beat education in reach of all. It is not a money-making institution. Its instruction is a free gift. It aims to help those who value education and will help themselves, and charges a small incidental fee to meet expenses of the school apart from instruction. Students must also pay for their board. Expenses for term (12 weeks) may be brought within \$24, about half of which must be paid in advance.

The school is endorsed by Baptists, Congregationalists, Disciples, Methodists, Presbyterians, and good people of all denominations. For information or friendly advice address the Vice-President,
